Acne, in carcinoma, of breast, 870-872
ACTH, effect of, on adrenal, accessory celiac revealing, 151
  on N and P metabolism, 933
  and nevus, junctional, activation of, spontaneous, 13
  originating after, 5
  for reticulo-endotheliosis, systemic, acute, 337
Adenocarcinoma, anaplastic, of salivary glands, 1116
  of cervix, chemotherapy of, 281
  growth of, in chick embryo, 400, 411
  latent, of prostate, 533
  of lung, in Thailand, 189
  mucinous, of pancreas, with fibrinogenopenia, 862-869
  of stomach, 315
  mucous-cell, of salivary glands, 1119
  of oral cavity, in Thailand, 189
  of ovary, chemotherapy of, 281
  of pancreas, TEPA for, 136
  papillary, argentaffin-cell containing, of nasal cavity, with metastases, 699-703
  of prostate, chemotherapy of, 281
  of rectum, chemotherapy of, 281
  of salivary glands, 1110
  in situ. *See also* Carcinoma, intraepithelial
  of cervix, 887-897
  of endometrium, 887
  solid, of salivary glands, 1116
  trabecular, of salivary glands, 1116
  of uterus, chemotherapy of, 281
Adenoma. *See also* Polyp, adenomatous
  of adrenal, 749
  bronchial, peripheral, multiple, 555-567
  chromophobe, of pituitary, anterior, in carcinoma, of breast, 243
    after estrogen, 244
  of islets of Langerhans, in rat, 507
  of liver, 857
    and focal cirrhosis, 743-755
  malignant, of thyroid, in Thailand, 189
  origin of, multicentric, 567
  oxyphilic-cell, of salivary glands, 1126
  of salivary glands, sebaceous-cells in, 1131
Adrenal, accessory, celiac, 149-152
  adenoma of, 749
  histology of, after 3'-methyl-4-dimethylaminoazobenzene, after hypophysectomy, 1025-1029
  medulla, anlage of, extra-adrenal neuroblastoma of, with brain metastases, 512-515
  of rat, pheochromocytoma of, pathogenesis of, 494-511
  weight of, and amphophils, hypertrophic, carcinoma of breast and, 245
Adrenalectomy, bilateral, for carcinoma, advanced, of breast, 997-1009
  of prostate, 997-1009
  for cancer, advanced, survival after, 1007
  of ovary, 1003
Adrenocorticotropic hormone. *See* ACTH

AUTHOR'S REPRINTS

A sharp increase in printing cost has made necessary a study of means of averting larger deficits in publication of CANCER. Several proposals have been made to members of the Advisory Editorial Board. As an initial step toward reduction of expenditure, the Board has decided by large majority vote to *eliminate free reprints to authors.* In so deciding the Board has followed a precedent set by numerous other journals.

The attention of authors is likewise called to the fact that, for about one year, contributors have been asked to defray a portion of the cost of illustrations in excess of standard allowance, this portion amounting to slightly less than one half the actual cost to the journal, the balance of the excess being paid for by the American Cancer Society.

ERRATUM

In the article: Dunn, J. E.: The Relationship between Carcinoma in Situ and Invasive Cervical Carcinoma, CANCER 6: 873-886, September, 1953, the equation in the right-hand column on page 883 should read:

$$\frac{AB}{2} + \frac{BC}{2} \text{ (Fig. 1), or } \frac{5}{2} + \frac{2}{2} = 3.5$$
